Installer Certification

The Installer Certification class is for entry level and experienced roofers who want to expand their skills, and consultants and inspectors who work with tile roofing. Each attendee will be given a Moderate Climate Installation Guide for Clay and Concrete Tile. This Guide has an ICC endorsement which makes it the code and minimum requirements for clay and concrete tile installation. The guide is adopted as the installation manual most US clay and concrete tile manufacturers.

Those who pass the multiple choice test can market their knowledge using the Installer Certification logo on their website and marketing materials. Pre-registration (\$199) is required due to limited seating.
