Tile Roofing Industry Alliance

JOIN OUR UPCOMING FREE TRI SHORT COURSES 5/12 AND 6/4

This week the TRIA Executive Board Members safely gathered in Scottsdale, Arizona for the first time in over a year. We discussed our budget for the following year, an upcoming membership drive, new marketing initiatives and advanced plans for expanding the footprint for our industry for the next several years.

TRIA Social Media and Digital Marketing Coordinator, Reagan Campbell visits Arizona job site during our May board meeting.

We concluded our meeting with a visit a local plant and design center.

## Educational Update

TRI Alliance's certification training programs are designed to train roofers and roofing professionals in code-approved installation methods. Codes are often updated, especially in hurricane-prone and fire-prone regions, and TRI Alliance provides the latest information on rapidly changing standards and upgrades to installation techniques.

Check out our upcoming training courses today!

## *Upcoming Training Schedule*

### **5/12: FREE TRI Short Course- Evaluating a Tile Roof: What you can see, what you can't**

Every roof is different, so we will look at a variety of common items and show the value of forensic inspections that view the flashing and underlayment system of a tile roof, before prescribing a solution. We will have time for Q & A at the end of the presentation. If you have a specific question about how to evaluate a tile roof, please include it when you register.

### **5/20: Manual Certification Webinar**

The TRI Manual Certification training is for entry level and experienced roofers, consultants, and industry professionals who work with tile roofing (outside of Florida\*), and want to expand their skills. It provides a foundation of knowledge for people new to the industry and helps more experienced people gain efficiency.

## 6/4: FREE TRI Short Course- Concrete Tile Roofing Used as Siding? Plus, Roof Tile Fastening in High Wind Zones

This presentation will walk through the installation techniques, changes to the architectural details, layout for the siding installation with matching mitered corners, flashing at windows, doors, and signage, integration of the wall tiles to the roof tiles and designing a (hopefully) bullet proof installation on a low sloped roof. Attendees will learn how to attach concrete tile as wall cladding, how flashings are used on sidewalls and design considerations on a low slope high wind tile roof.

## 6/10: 6th Edition Florida High Wind Certification Webinar

This class is for entry level and experienced roofers in Florida who want to expand their skills and understand the new codes effective with the **6th Edition FRSA/TRI High Wind Installation Manual**. The class is also helpful for roof consultants, home inspectors and industry professionals who work with tile roofing in Florida.
